

Laser Scan Micrometer Display Unit

Series 544

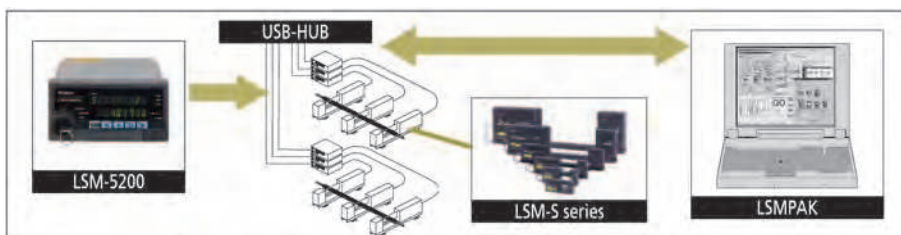

LSMPAK

- This software can import measurement data from multiple LSM-5200 Display Units to a personal computer, allowing a variety of measuring systems to be constructed.
- Capable of processing measurement-point data of max. 10 channels (USB-HUB connection).
- Capable of composite calculation between Measuring Units (multiple channels), statistical calculation and calculation results output as a file.

Specifications

- Operating Environment
- Connection interface: USB2.0
 - PC : DOS/V(IBM) compatible machine
 - CPU : 2GHz or more (recommended)
 - OS/software : Windows XP, Excel 2000 or higher
 - Memory : 256MB or more (recommended)
 - Applicable display unit : LSM-5200

- Other Functions
- Rich choice of functions
(e.g. counter, graphs, calculation results)
